## EDUCATION

**Bachelor of Science in Mechanical Engineering**
*Franklin W. Olin College of Engineering | Expected Graduation: May 2029*
*GPA: 4.00*
Relevant Courses: Statics, Thermal Fluid Systems, Principles of Integrated Engineering, Differential Equations, Multivariable Calculus, Linear Algebra

## ENGINEERING EXPERIENCE

**Mechanical Engineering Intern | Owl Vision AI, Needham, MA** ***February 2026 – Present***

- Design custom bug trap housings in Onshape to interface with Owl Vision's eScout field monitoring device
- Rapidly prototype parts using 3D printing and bench testing to validate trap effectiveness, weather resistance, and field usability
- Collaborate directly with the CEO on DFM, tolerance analysis, and BOM optimization, reducing part count by 20% and streamlining field assembly with clients

**Chassis Subteam Member | Olin Baja SAE Team, Needham, MA** ***September 2025 – May 2026***

- Manufactured and maintained off-road chassis and suspension components using CNC plasma cutting and manual machining to meet strict SAE competition rules
- Designed and fabricated custom ABS body and floor panels in Onshape, integrating quick-release mounting pins for the 2026 competition car

**Robotics Intern | Olympic Collectible AI Solutions, Renton, WA** ***August 2024 – June 2025***

- Developed and assembled CNC Mini-Robots capable of sorting, identifying, and grading sports trading cards
- Diagnosed and tested new code, stepper motors, and pick-and-place processes for Mini-Robots
- Integrated mechanical drivetrains, wiring harnesses, and sensor arrays for large-scale production sorting robots deployed to commercial customers

**Mechanical Engineering Intern | Fresh Consulting, Bellevue, WA** ***September 2023 – December 2023***

- Assembled a ~27,000-part industrial machine engineered to heat and bend custom PVC pipes at factory production scale
- Interpreted SolidWorks assembly drawings and engineering documentation to verify mechanical tolerances and resolve issues with senior project engineers

## LEADERSHIP & INVOLVEMENT

**Board Member | MIRAI Cultural Alliance, Needham, MA** ***April 2026 – Present***

- Manage event logistics and organizational budgets alongside Olin's JSA (Japanese Student Association) and Babson's JIC (Japanese International Circle)
- Raised over $10,000 running a booth at Japan Festival Boston 2026, serving Okonomiyaki to festival goers

## SKILLS

- CAD Software: SolidWorks, Onshape
- Programming Languages: MATLAB, Python, C, C++
- 3D Printing: Bambu Lab, Prusa
- Fabrication: CNC Router, CNC Plasma Cutter, Manual Mill, Laser Cutter, Soldering
